

# PROFESSIONAL PHOTO PAPER PE 300

lustre 4802, 300 g/m<sup>2</sup>

Robust premium photo paper with lustre finish for photographic applications

Micro porous coated photo paper with a PE film coating on both sides and a satin-gloss finish with low reflective properties. This photo paper has been especially developed for printing on aqueous printers. Prints boast excellent colour or black & white reproduction. These properties make Professional Photo Paper PE 300 a premium photo paper that is not only ideal for picture presentation in difficult lighting conditions, but is also resistant to dirt or fingerprints.

## Advantages

- Brilliant colours, fine colour tone differentiation and natural rendering of skin tones
- Perfect grey balance, optimum contrast and deep, rich blacks
- Very good long-term stability
- Completely odourless
- Quick dry

## General tips

The ideal storage conditions are a relative humidity of 35-65% and temperatures of 10-30°. Lamination is recommended to secure long-lasting unchanged image quality because catalytic processes initiated by atmospheric components deteriorate dye colors with time (not valid for pigments). We recommend that cotton gloves are worn to prevent the transfer of dirt, moisture and oils from the skin, as these can greatly impair the print quality.

## Physical data

Name	Value	Norm
Weight [g/m <sup>2</sup> ]	300	ISO 536
Thickness (total) [µm]	290	ISO 534
Opacity [%]	97	ISO 2471
Gloss (60°)	18	ISO 2813
Chromaticity (D50/2°) M0	L* 95.7 / a* 1.2 / b*-7.0	ISO 13655, M0

## Technologies

The values stated above are only for orientation. Before using our print media please check its compatibility for your printer and the intended application. We cannot be held responsible for any mistakes resulting from technical changes in the printing process and with printing components. Product design changes to our products technical developments may be carried out without prior notice.
