

SYNTISOL PP GREYBACK 170

satin 3392, 170 µm

Polypropylene display film with greyback for roll-up display systems

SyntiSOL PP Greyback 170 has been developed for use in combination with solvent, latex and UV ink systems for roll-up displays. Its special coating guarantees a durable and scratch resistant printed image characterised by outstanding colour brilliance, saturation and image sharpness. The tear resistant polypropylene base guarantees problem-free processing and, thanks to the greyback, provides high opacity. Thanks to its outstanding value for money, SyntiSOL PP Greyback 170 is an ideal choice for the production of volume products for mid- or short-term use.

Advantages

- Brilliant colour reproduction
- Excellent contour definition
- Greyback for high opacity

General tips

To sustain quality of this media, it should be stored and converted under the following conditions: 35 – 65 % humidity with temperatures of 10 – 30°C. Keep the product in original packaging (cardboard box and PE bag). Cotton gloves should always be worn when handling inkjet media to avoid fingerprints.
